MATIQ.IO

STEP INSIDE YOUR VISION

THE PROBLEM

Current design tools and processes are inefficient, offering limited real-time visualization, time-consuming revisions, and challenges with product integration. This leads to delays, increased costs, and misaligned client expectations.

THE PROBLEM

Visualization is Available Only at the Final Stage

Developers only see the 3D renderings after the project is completed, preventing them from tracking design progress in real-time

Complex Planning Under Budget Constraints

Every design choice must adhere to the budget, requiring significant time, attention, and careful planning.

Time-Consuming Revisions

If the developer is unsatisfied, repeated adjustments to the rendering are required, leading to delays and increased costs.

Non-real Products in Renderings

Some products shown in renderings are conceptual and unavailable for purchase, which can lead to inaccuracies and misaligned client expectations.

Hard Work to Import Existing Products

Bringing real products into the rendering system requires extensive search and manual importing of the selected items.

WE ARE MATIQ.IO

Matiq.io provides architects and designers with advanced AR technology, enabling fast and accurate visualizations through an easy-to-use interface. Our platform integrates effortlessly with existing tools, fosters seamless collaboration, and completes simulations in a matter of seconds.

THE SOLUTION

Our solution is a smart system that takes a bill of quantities and specifications as input, generating a precise, realistic 3D model (with future integration of AR and VR).

This allows developers to visualize their project in a tangible and accurate way.

If something doesn't align with their vision, they can effortlessly swap out or modify specific items using an intelligent recommendation system, all based on readily available products.

THE MARKET OPPORTUNITY

The Visualization and 3D Rendering Software market was worth **$1.693 billion** in **2021.**

Cutting-edge technologies are revolutionizing construction and architecture, making processes more cost-effective and efficient.

Over **75%** of architects use real-time rendering platforms weekly.

Current systems lack real-time updates and multiple design displays, leading to complex workflows.

COMPETITORS

CEDREO

Cedreo is an online 3D home design software for construction and remodeling professionals, enabling quick 2D/3D floor plans and photorealistic renderings with a library of 7,000+ objects.

5d

Planner 5D is a user-friendly home design platform for detailed 2D/3D layouts, with a vast catalog, realistic renders, cross-device sync, and a large community for design sharing.

HOMESTYLER

Homestyler is a web-based 3D design tool for floor planning, modeling, and rendering, with a large furniture library and cross-device sharing.

COMPETITIVE ADVANTAGE

User-Friendly Interface

Matiq.io simplifies the creation of customized visualizations.

Enhanced Collaboration

Matiq.io enhances collaboration and design clarity.

Cost-Effective Solution

Matiq.io in-house visualization production reduces up to **$10,000** per project.

Cutting-Edge Innovation

Matiq.io provides realistic visuals, an intuitive interface, and real-time collaboration.

Efficiency and Speed

Matiq.io delivers high-quality visualizations in minutes, enhancing productivity and efficiency.

Scalability

Matiq.io's tiered subscriptions support freelancers to enterprises, allowing scalable growth.

BUSINESS MODEL

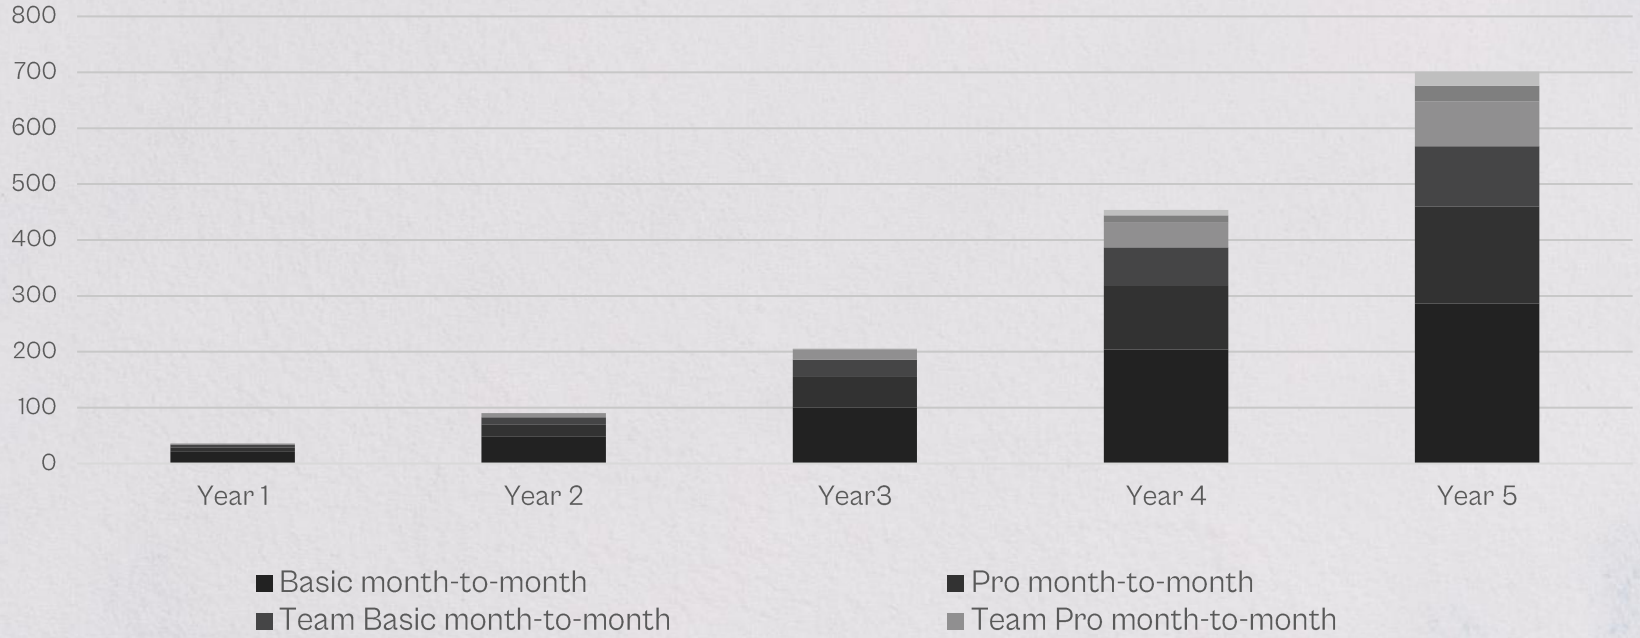

The company provides customizable subscription plans, tailored to team size and project needs, so customers pay only for what they use.

	Subscription plan	Duration	Monthly price ($)	Annual price ($)
Individuals	Basic	Month-to-month	175	2,100
	Basic	12	158	1,890
	Pro	Month-to-month	285	3,420
	Pro	12	257	3,078
Teams (up to 5 users)	Basic	Month-to-month	175	2,100
	Basic	12	158	1,890
	Pro	Month-to-month	285	3,420
	Pro	12	257	3,078
Midsized Companies (up to 20 users)	Basic	Month-to-month	175	2,100
	Basic	12	158	1,890
	Pro	Month-to-month	285	3,420
	Pro	12	257	3,078

FORECASTED OPERATIONS

No. of Monthly Subscribed Customers

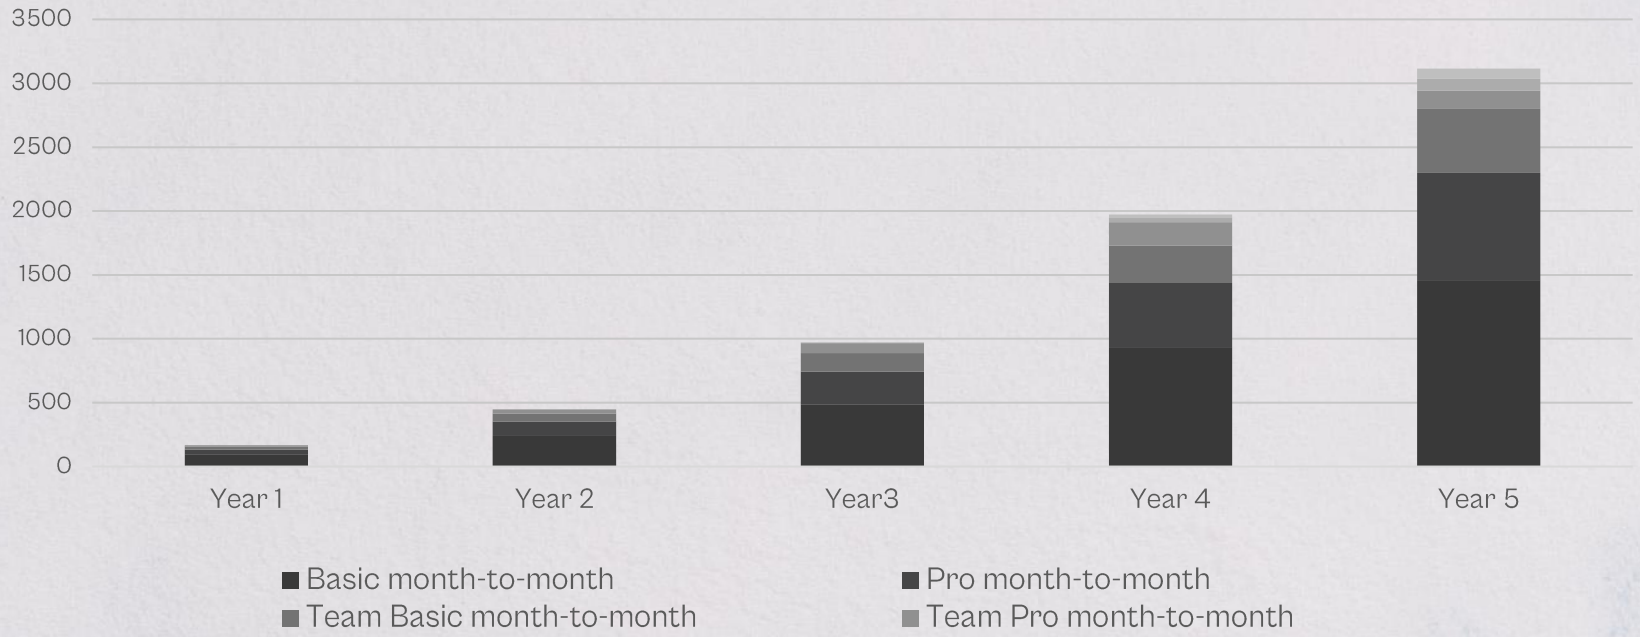

The following graph presents the total number of subscribed customers to monthly billed plans each year of the company's operations:

FORECASTED OPERATIONS

No. of Annually Customers

The following graph presents the total number of annual payments to the company's various annual subscription plans:

FORECASTED OPERATIONS

Revenue

The following chart presents the total expected revenues, in the upcoming 5 years of operations:

FORECASTED OPERATIONS

The company provides customizable subscription plans, tailored to team size and project needs, so customers pay only for what they use.

$ 2,456,598

Total Required Investment

Time 0	Year 1	Year 2
433,675	1,349,132	673,791
